John and Jim

I'm not at all familiar with this. I see that Reg King and the JIG may have had some insight. Can either one of you advise me.

Thanks

Brian

David W, would you kindly add this to the Gant Chart for tracking purposes.

Good Day Sir

I am assisting Natural Resources Canada (NRCAN) in the delivery of its Classified Briefing for the Energy Sector Stakeholders, which will be held at the CSIS HQ (Ottawa) on November 25, 2010.

NRCAN has requested that the RCMP provide a debrief on the G8/G20 meetings. As you may recall, Reg has previously presented to this audience with the objective of informing the private sector about the meetings and also solicit their assistance.

As the RCMP will undoubtedly be relying on the private sector for future large conferences, it would be of great value to have the RCMP present to provide a lessons learned overview. Basically closing the loop.

It has been our experience that the more we engage the private sector, the more we learn to use in the development our contingency plans.

All those in the audience will have a Secret clearance, note taking will be prohibited.

FYI - the Olympic JIG provided pre and post debriefings to this audience.

Thank you in advance for your anticipated assistance.

Tim

Intelligence Process being used in the JIG

Wheel turns continuously

Commander has critical intelligence requirements,
collection plan drafted based on those requirements

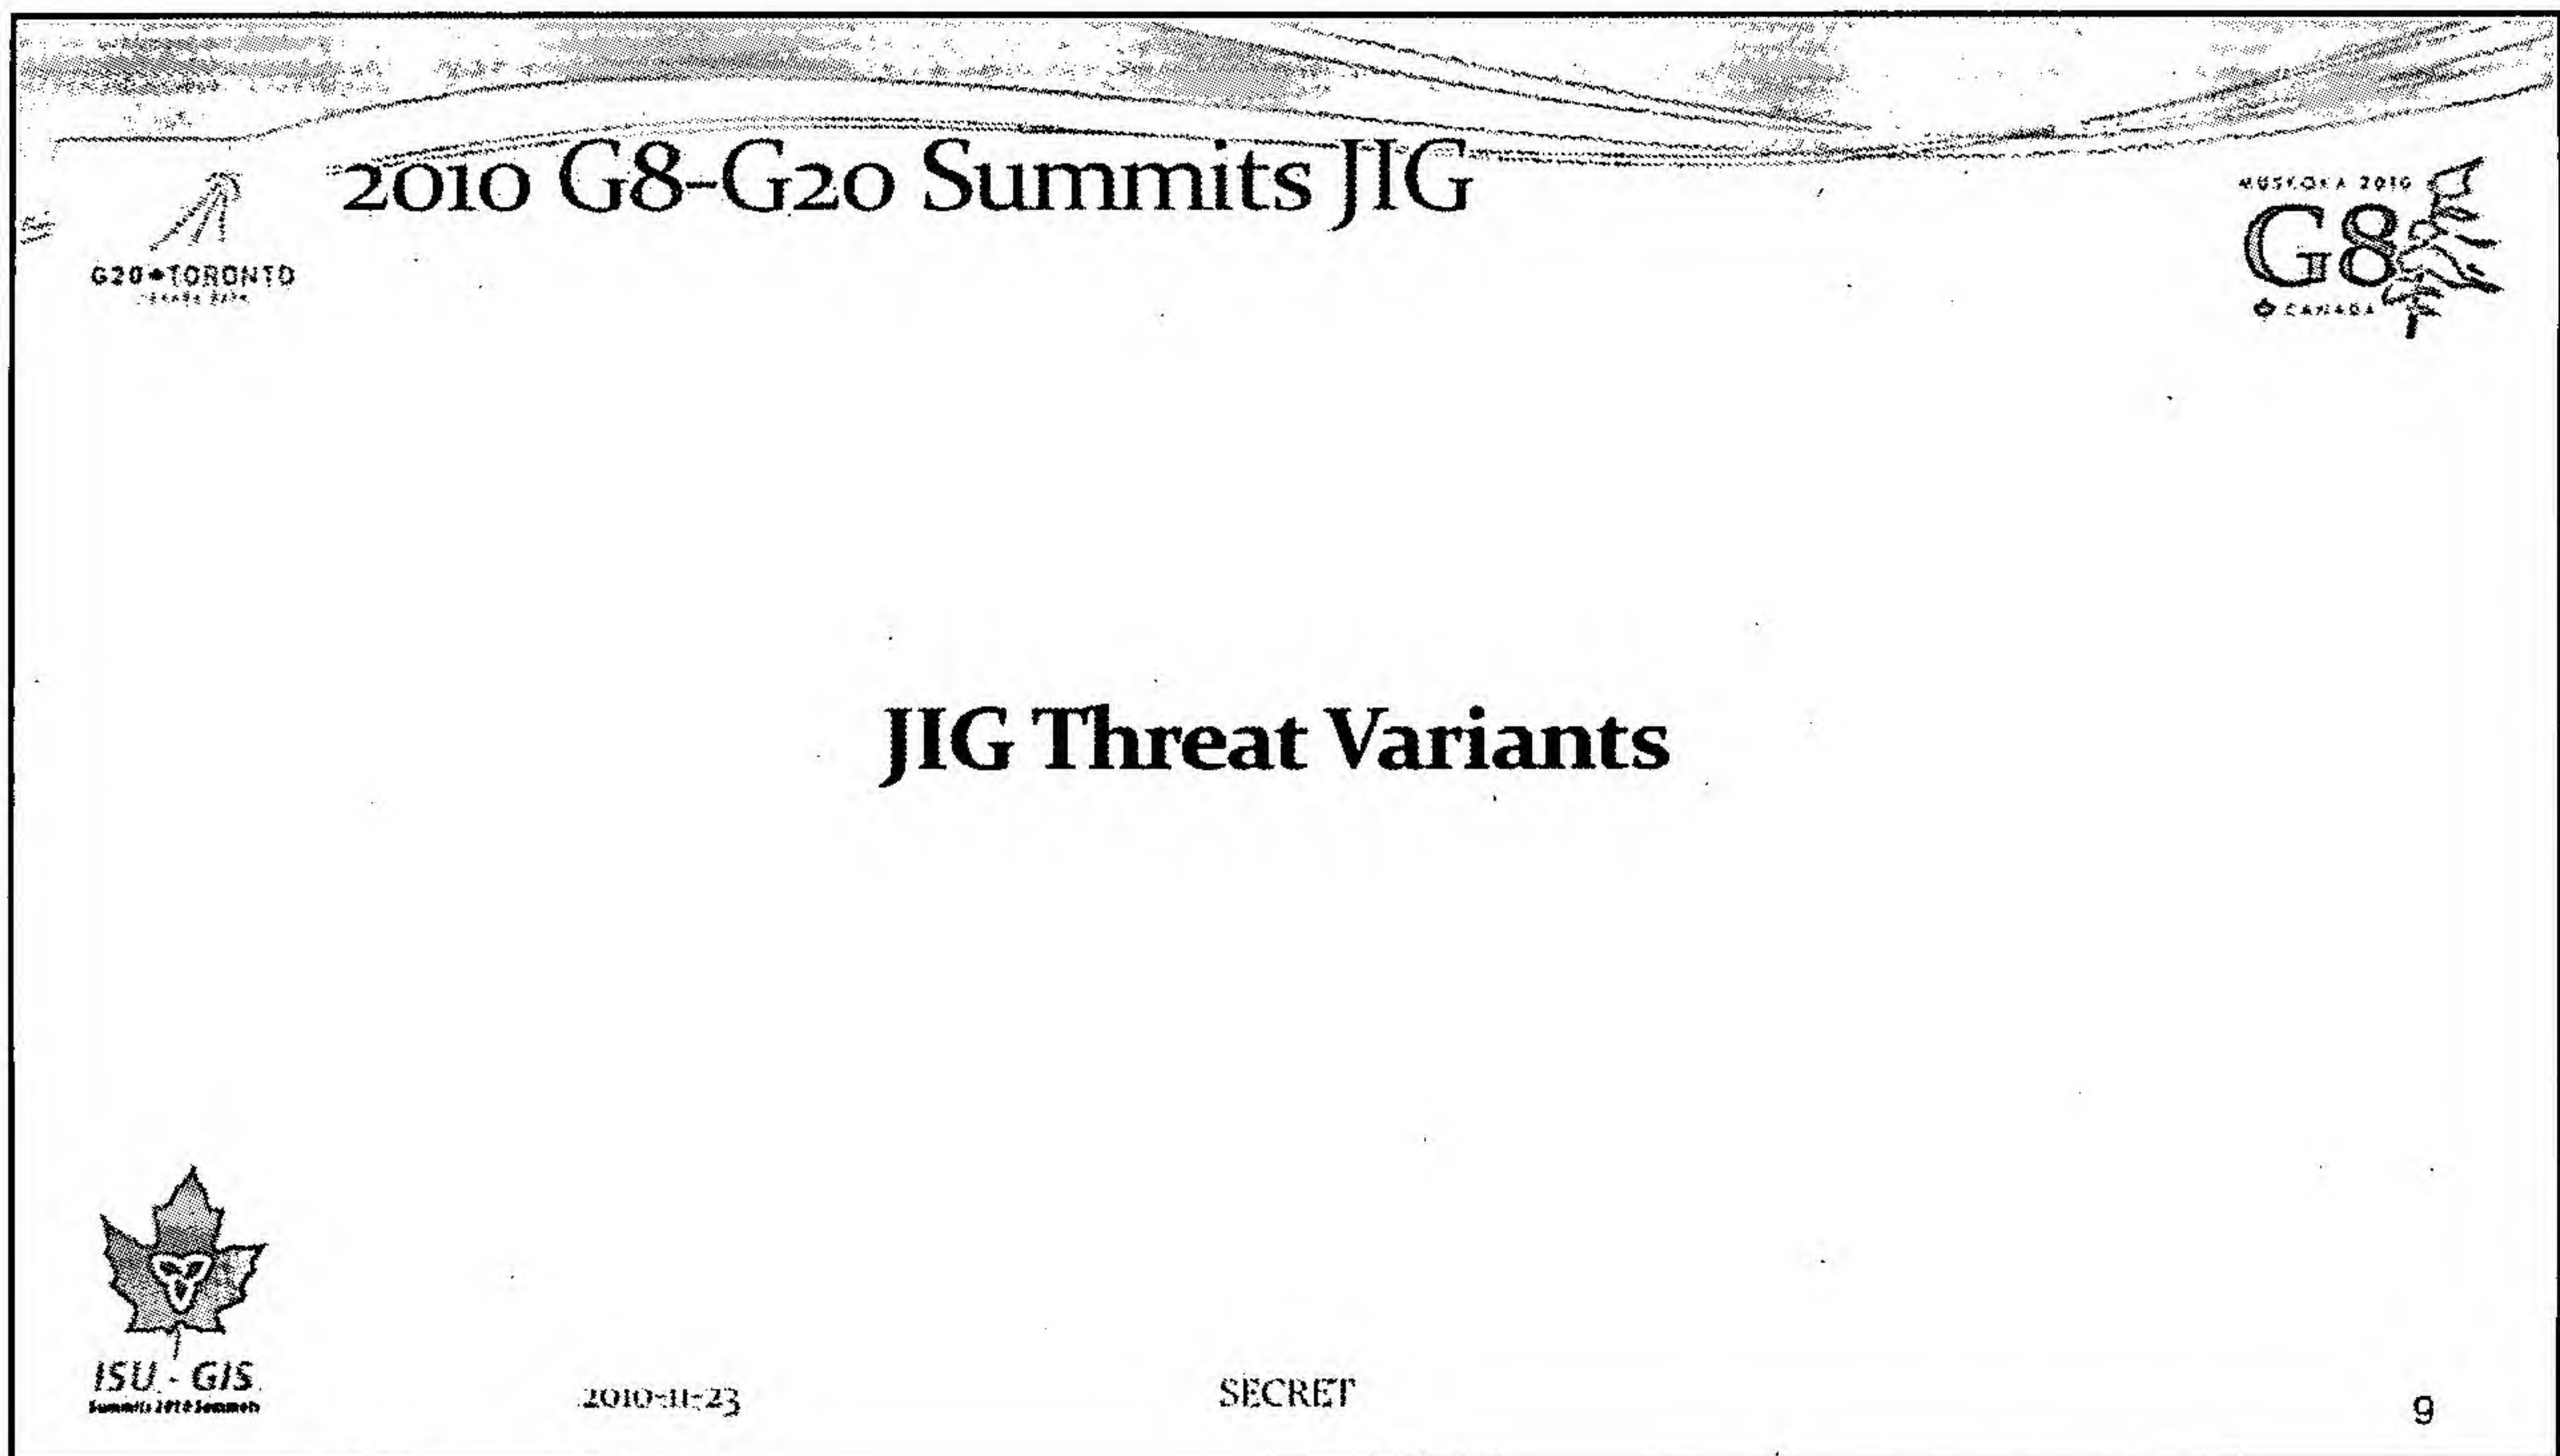

Go around red wheel starting at Determine.

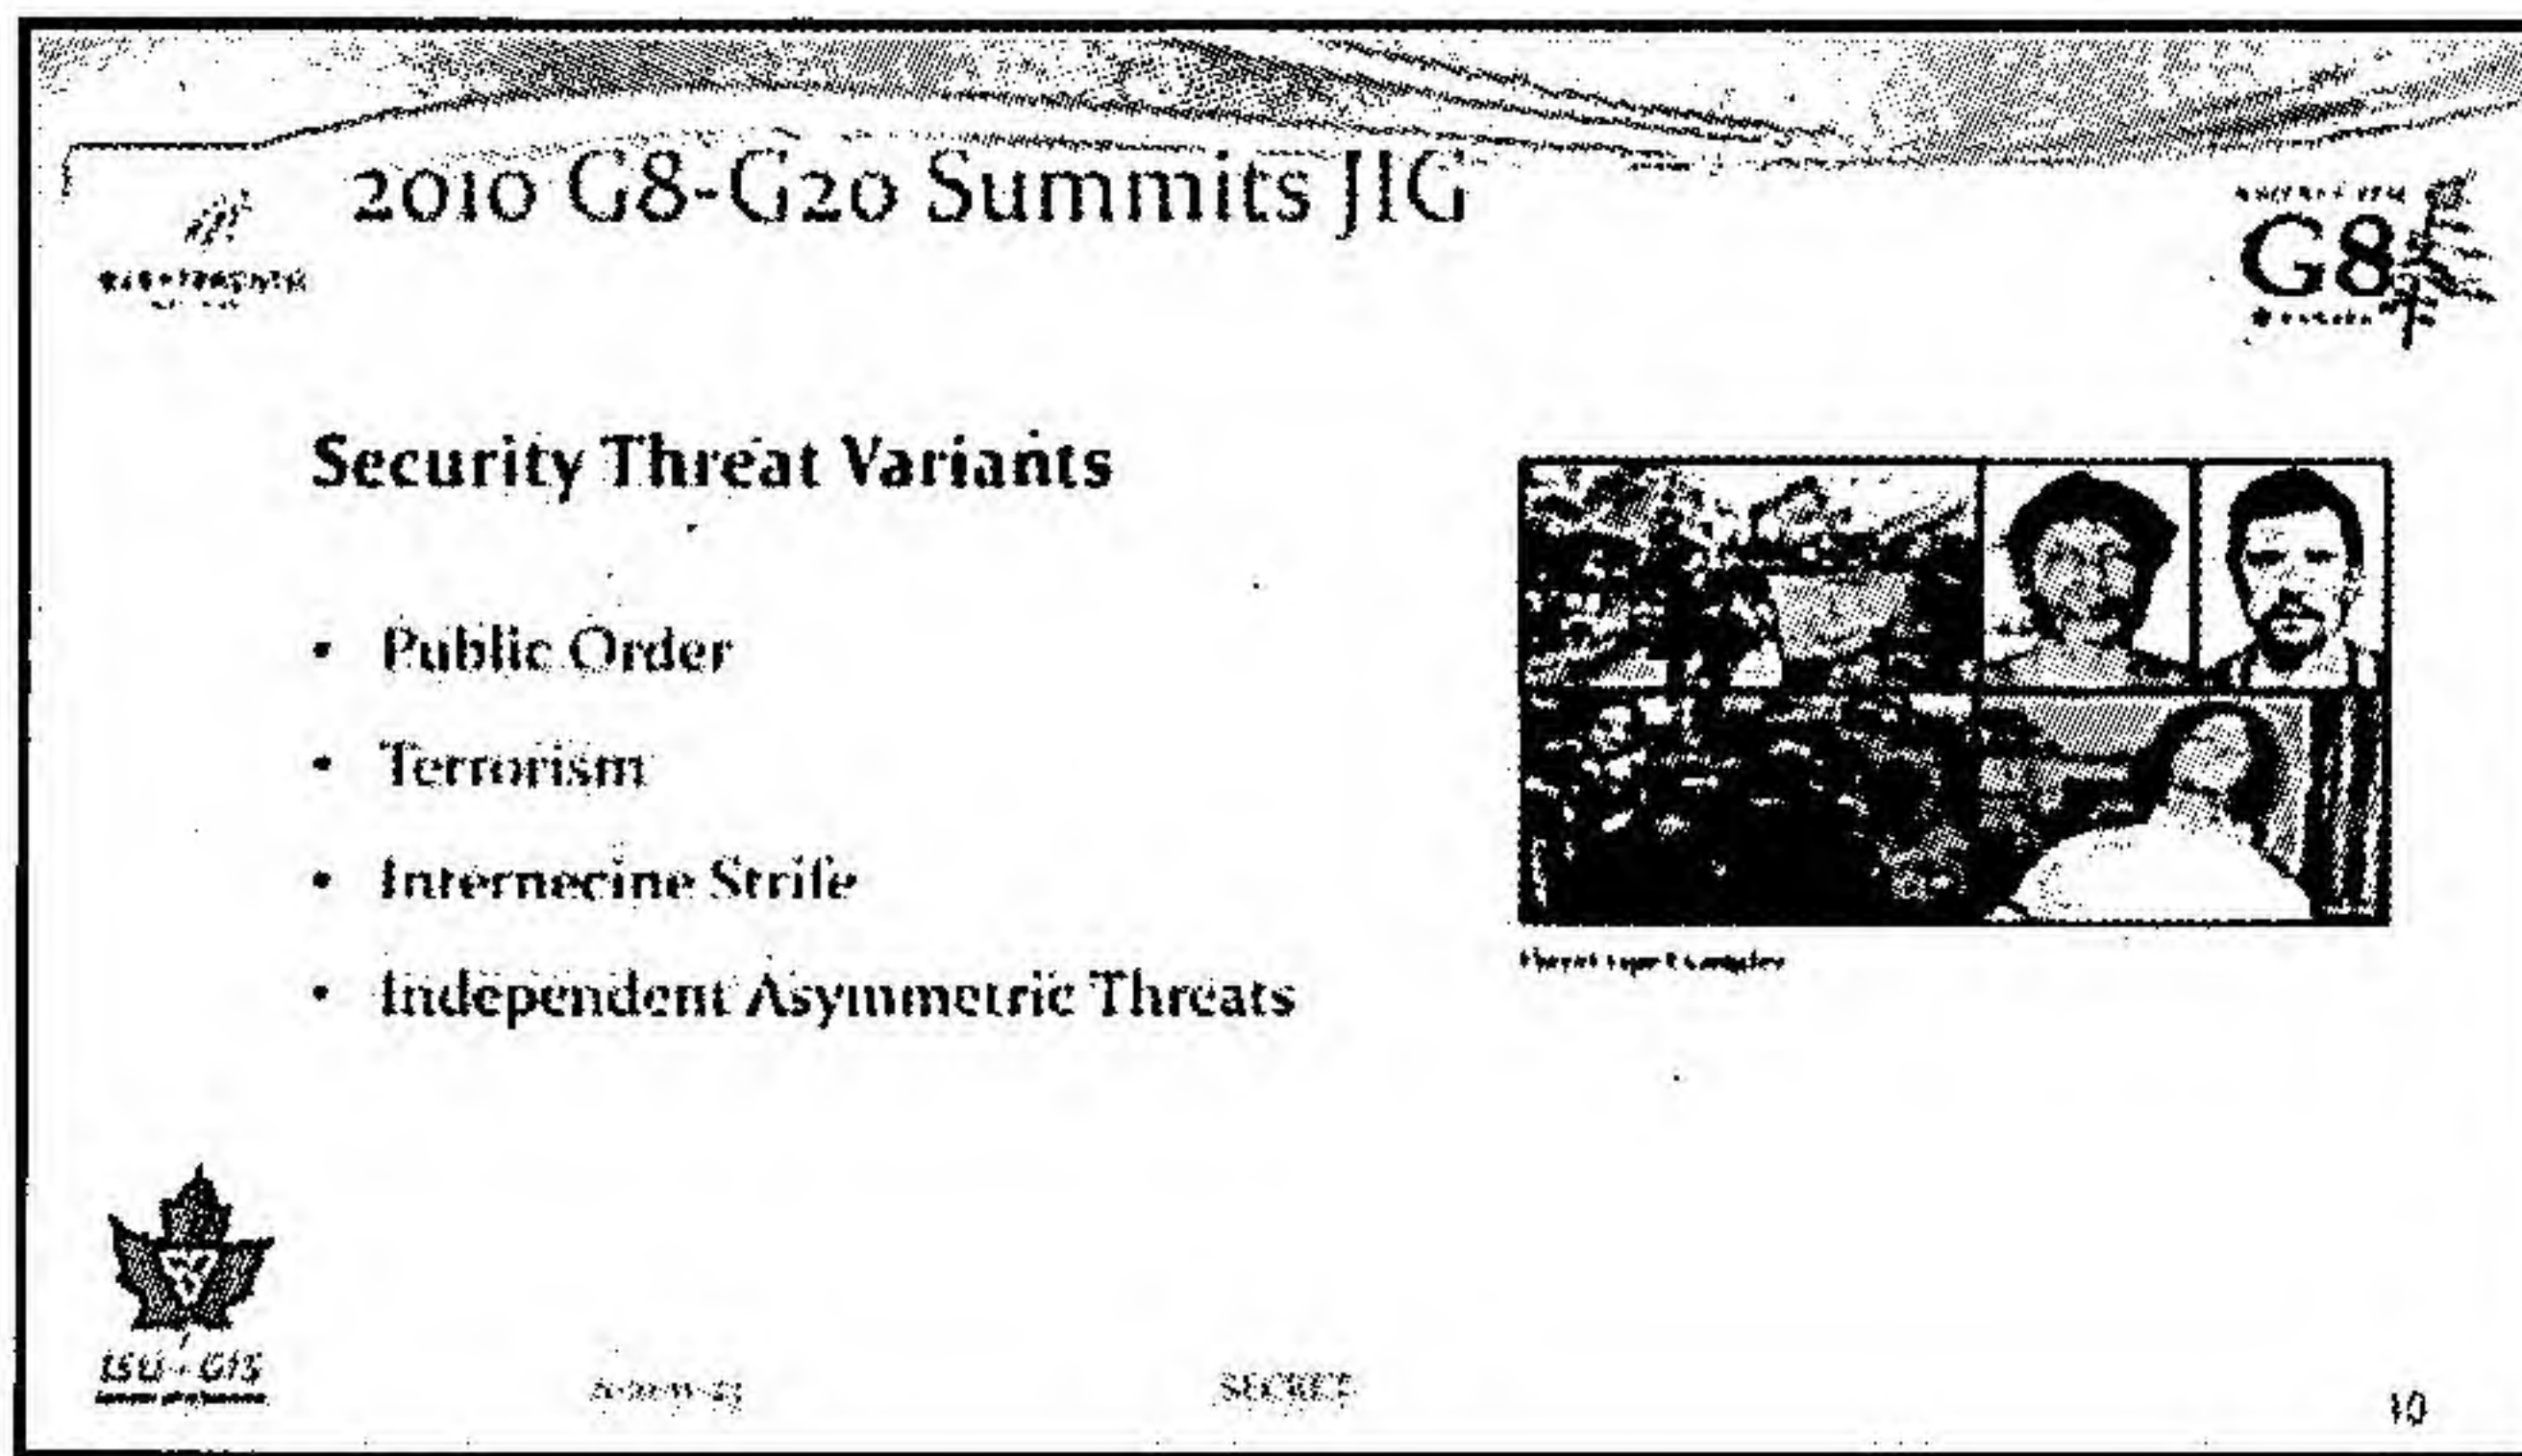

LMT just delivers

Consumption is both internal/external

No end to the process – continuous.

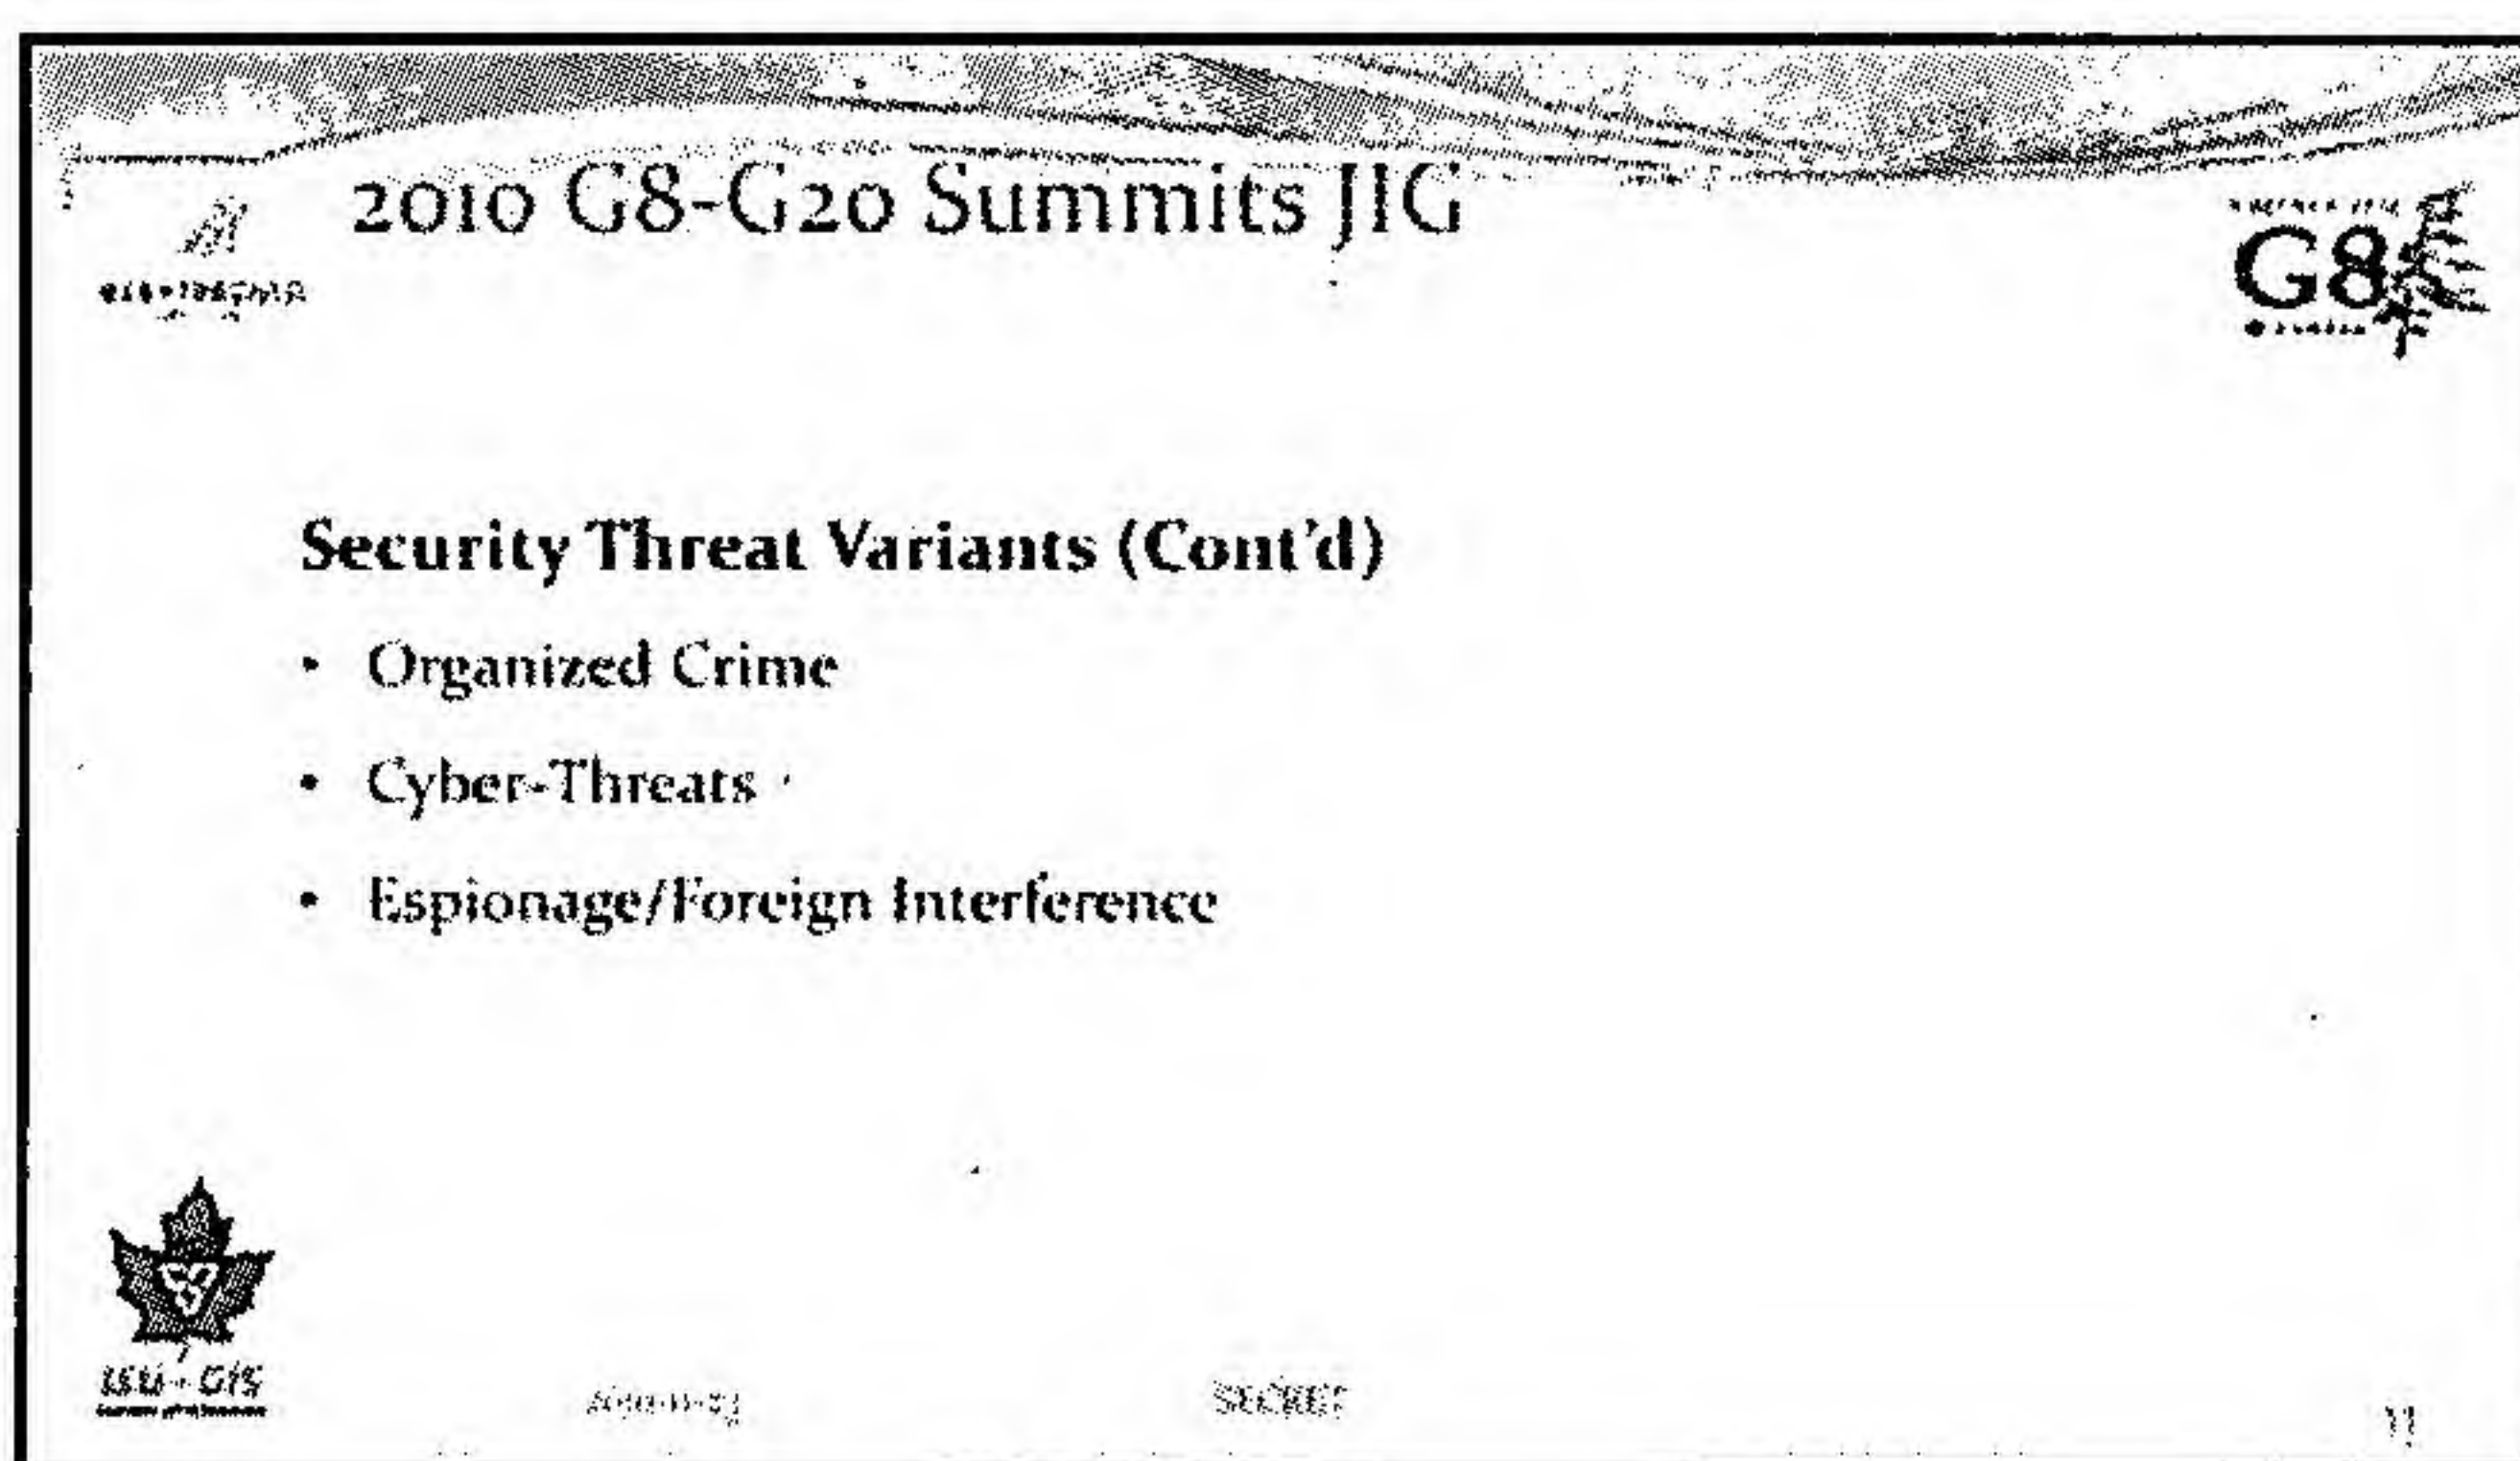

Intelligence collection always starts with planning and direction.
